

Europe Health & Safety Charter

We have a sincere, consistent commitment to provide a culture where safety is more than a priority, it is a company value. Safety is integral to everything we do and as such, we are all responsible to:

- Openly share our knowledge and experience of health and safety practices throughout the organization, allowing our culture to flourish.
- Make certain that we conduct our activities not only for our own protection, but also for colleagues, contractors, and visitors.
- Ensure the health and safety of those who build, test, operate, install and maintain our equipment. Products will only be shipped or commissioned when we are confident of their safe operation, extending our commitment to the safety of our customers and their employees.
- Educate and encourage individuals, through training and awareness, to identify unsafe situations, and act to resolve them with a sense of urgency.
- Build a better living environment for those around us by extending our safety culture beyond the workplace.
- Take pride in our safety culture and its continued growth and success.
- Share our successes and achievements locally and across the Barry-Wehmiller group.

Our objective is to ensure that every life we touch arrives home healthy, safe and fulfilled.
