Design Group Expands in Texas

ST. LOUIS, MO — March 24, 2015 — Barry-Wehmiller Design Group announced that it has expanded its presence in Texas with the addition of three new engineering offices, to complement its existing office location in Dallas. The new offices have all opened in early 2015, and are located in Ft. Worth, Houston, and San Antonio. Together with the firm's Dallas office location, Design Group now has over 75 engineers and project managers based in Texas.

“The demand for facility engineering, industrial automation, and system integration services is robust in the Texas area,” states Bruce Kuebler, Design Group Partner. “With four engineering offices in these key metropolitan areas, we are in a very strong position to serve our clients’ needs throughout Texas and the South Central region of the US.”

“We are extremely pleased with the high quality of technical talent that has joined our firm in Texas,” added Joseph Wilhelm, Design Group Managing Partner. “These new offices were designed with capacity for additional growth, and we expect to have 120 engineers and technical professionals based in Texas in the next several years.”

Design Group provides technology solutions to a broad range of manufacturers in food, beverage, life sciences, and other industrial sectors from more than 30 offices across the US. According to Wilhelm, the firm has experienced a track record of continuous growth for more than 25 years. “We have seen strong demand for our services across the US, and we are excited that Design Group is poised to exceed 1,000 professionals in the firm for the first time in our history.”

ABOUT DESIGN GROUP

Barry Wehmiller Design Group operates from over 30 offices across the U.S. and Puerto Rico providing engineering and technology services to the world's leading companies through the efforts of almost 1000 engineering and technical specialists. Design Group professionals have direct industry experience with industrial automation, process engineering, regulatory compliance and systems integration. Design Group also provides professional engineering, architectural and construction management services through our wholly owned and professionally licensed subsidiary, Design Group Facility Solutions, Inc.
