PCMC to attend FFTA INFO*FLEX 2016

Green Bay, Wis., February 4, 2016 — Paper Converting Machine Company (PCMC) will showcase its unique advantages of its wide and narrow web printing presses at INFO*FLEX 2016. Our experts will be on-site to talk about the Fusions Compact, our newest innovative machine. The Fusion Compact is loaded with the same fast make-ready and waste saving features as PCMC's Fusion family of products. – but with a smaller footprint. PCMC invites individuals to visit the company's booths #205 and #206 at the event. FTA's INFO*FLEX 2016 will be held March 7-8 at the Fort Worth Convention Center in Fort Worth, Texas.

PCMC is a unique manufacturer with the ability to supply a broad range of solutions from 24" to 75" wide web flexographic, and inline to common impression presses capable of running up to 2500 FPM with 48 gauge film to 28 pt. board stock. PCMC offers compelling solutions to current and future business challenges with flexographic presses printing 175 line screen or greater. Our experts at INFO*FLEX will be available to explain key features and advantages of our flexographic presses over offset presses. These include the following:

PCMC's ELS-MAX: A fully gearless flexographic sleeved printing press that incorporates features and capabilities typically associated with CI quality register, fast speeds and high quality printing. This press platform is unchallenged in its market. The ELS-MAX platform offers flexibility as well as quick changeover and lower waste/shorter-run opportunities. By merging the strengths of both wide and narrow printing platforms, this technology gives printers the edge they need to stay competitive.

PCMC's Fusion and Fusion Max: Both machine platforms are loaded with fast make-ready and waste saving features. The Fusion press platform offers automated solutions that increase uptime and productivity. The Fusion line of machines significantly reduces the energy requirements by utilizing low power consumption components, designs, and operations. Make sure you stop by to hear more about PCMC's NEW short-run, fast make-ready and low waste press solution.

"INFO*FLEX is a great opportunity for PCMC to engage with customers and prospects about how our machines can benefit them," says Rich Rogals, sales director. "We always welcome the chance to provide details of how we can provide flexible and cost saving solutions."

ABOUT PAPER CONVERTING MACHINE COMPANY (PCMC)

Paper Converting Machine Company (PCMC) specializes in the design and manufacture of high-performance converting machinery for the global tissue, nonwovens, package printing and envelope manufacturing industries. Its comprehensive product offering includes rewinding, laminating, printing, embossing, perforating and packaging equipment for tissue and towels; folding and converting machines; and a complete range of flexographic printing presses serving the flexible packaging, prime label and carton converting industries.
