PneumaticScaleAngelus to Promote New Technology and Advancements at Pack Expo 2015

STOW, Ohio — June 23, 2015 — PneumaticScaleAngelus, a global provider of fillers, cappers, can seamers, labelers, wet case detectors, orienters and centrifuges, will promote its latest innovations in technology at Pack Expo 2015, September 28-30, in Booth #C-1800 at the Las Vegas Convention Center in Las Vegas, Nevada.

A team of professionals from PneumaticScaleAngelus will be available throughout the show to discuss all of the company's latest offerings and improvements, including our Level I Filler (pictured). The Level I Filler offers a smaller footprint, a more sanitary environment and positive container control. This Level I Filler also dramatically reduces the chance of product contamination by immediately capping containers once they are filled. Additionally, the Filler has direct transfer which reduces spilling, as well as easy to use machine adjustments and performance monitoring.

We will also be featuring our Angelus V-Series Seamers. The V-Series debuted in spring of 2014 and has already received global enthusiastic recognition within the industry with over 15 machines sold thus far. Its sleek European design is engineered to exceed our customer's expectations for a consistent seam, quality and quick delivery.

PneumaticScaleAngelus has built upon a century of leadership and innovation to become one of the largest packaging machinery companies in the world, with annual revenues surpassing \$193 million. The combined strength of its legacy brands has enabled PneumaticScaleAngelus to emerge as a well-balanced provider of equipment and services to the pharmaceutical, personal care, food and beverage, canning and household product industries. The company now employs more than 700 team members across four manufacturing facilities in Stow and Akron, Ohio; Los Angeles, California; and Clearwater, Florida, with additional sales and service centers in the U.K., Belgium, Germany, Hong Kong, Canada, Australia, Italy and France.

ABOUT PNEUMATIC SCALE ANGELUS
