Accraply to host AWA Shrink Sleeve Label Workshop

Presentations and live demonstrations

PLYMOUTH, Minn. — June 13, 2016 — Accraply, a division of Barry-Wehmiller, will host live demonstrations at its Plymouth, Minn., facility during the *AWA Introduction to Heat-Shrink Sleeve Label Technologies 2016 Workshop* in July 2016, in partnership with AWA Alexander Watson Associates. This workshop, offered twice, serves as an interactive guide to the technologies and processes involved in the production and application of shrink sleeve labels.

Incorporating theoretical presentations with on-site demonstrations, the workshop also includes a “cures and remedies” panel discussion between workshop participants and industry specialists. In addition to Accraply, the two-day workshop is supported by Creative Edge Software, Flint Group Narrow Web, HYBRID Software, Klöckner Pentaplast and ThermoFlexX.

Workshop A is scheduled on Tuesday and Wednesday, July 19 and 20, and Workshop B, which includes an optional Spanish translation, is slated for Thursday and Friday, July 21 and 22. Flint Group Narrow Web hosts the first day of each workshop, and Accraply hosts the second day. Additional information can be found at awa-bv.com/events. Participation is limited, and registration currently is open.

“AWA events typically rotate locations year to year; however, the popularity of this seminar and the superb partnership with Flint Group Narrow Web and Accraply has worked so well that we return to Minnesota for a fourth consecutive annual event,” remarked AWA Alexander Watson Associates President and CEO Corey Reardon. “With the significant support and participation of leading international companies in this growing technology arena, we have been able to create a very special opportunity for anyone who needs to gain a sound education in heat-shrink sleeves.”

ABOUT ACCRAPLY INC.

Comprised of the Accraply, Trine, Stanford and Graham | Sleeveit brands, Accraply unites some of the most trusted names in product decoration and material converting. Known for its cutting-edge technology and innovative custom-engineered designs, Accraply has been credited with many industry firsts and advances in application and converting technologies. Accraply, a subsidiary of Barry-Wehmiller Companies Inc., is a leader in the design, manufacture and support of pressure-sensitive, roll-fed and shrink sleeve label application systems, as well as converting and finishing equipment for the shrink sleeve and flexible-packaging markets.
