Accraply Revolve™ shrink sleeve seamer line to launch at Label Congress

Modular seamers include innovative crash-proof forming table and next-generation controls

The Accraply Revolve™ line of seamer machines will launch at Label Congress, held September 29 and 30 in Chicago.

MINNEAPOLIS — Sept. 15, 2021 — Accraply, a global leader in the design and manufacture of shrink sleeve converting equipment, will introduce the Accraply Revolve™ line of seamers in booth 91 at Label Congress 2021, held September 29 and 30 in Chicago. This new line of modular shrink sleeve seamers includes three machine configurations that were engineered to make shrink sleeve seaming simpler and more efficient.

The Accraply Revolve machines leverage next-generation controls and an intuitive human-machine interface (HMI) to simplify operations. Through the HMI, operators can access step-by-step help guides, diagnostic reporting, preventive maintenance alerts, on-board parts ordering and several additional resources. Also, advanced machine design features eliminate operator error.

“One of the most exciting things about the Accraply Revolve line is how smoothly and easily the machines operate,” said Joe Leonard, Accraply’s Converting Product Line Leader. “The technology and servo motors work together to create a crash-proof forming table that restricts operators from inputs that drive the machine out of spec, which limits operator dependency and dramatically reduces the risk of downtime.”

Label Congress attendees will have an opportunity to explore all three machine configurations: the standard Accraply Revolve, the Accraply Revolve RT2 and the Accraply Revolve Fully Continuous. Each of these configurations has distinct, flexible options, with the intent to make it easier for customers to select the shrink sleeve seaming machine that is right for their business.

“Time and again, our team members have demonstrated their commitment to listening to our customers’ challenges and developing innovative labeling solutions,” said Justin Stovall, Accraply’s Vice President of Sales. “We are exceptionally proud of the Accraply Revolve line of machines, and look forward to sharing more with the industry at Label Congress.”

Accraply is one of several Barry-Wehmiller companies represented in [BW Packaging Systems](#), which brings together the collective packaging capabilities of Accraply, BW Flexible Systems, BW Integrated Systems, Pneumatic Scale Angelus and Synerlink.

ABOUT ACCRAPLY

Comprised of the Accraply, Graham & Sleevit, Harland, Stanford and Trine brands, Accraply unites some of the most trusted names in product decoration and material converting. Known for our cutting-edge technology and innovative custom-engineered designs, Accraply has been credited with many industry firsts, and advances in application and converting technologies. Accraply, a Barry-Wehmiller Packaging Systems company, is a worldwide leader in the design, manufacture and support of pressure-sensitive (self-adhesive), roll-fed and shrink sleeve label application systems, as well as converting and finishing equipment, for the shrink sleeve and flexible-packaging markets.
