Accraply introduces Sirius 100, a rugged, cost-effective pressure-sensitive labeler Labeling machine brings flexibility to front, back and wrap packaging applications

The Sirius 100, a cost-effective pressure-sensitive labeling machine, provides precise label placement accuracy for front, back and wrap applications in the personal care, household, food and pharmaceutical industries.

MINNEAPOLIS — Dec. 16, 2020 — Accraply, a worldwide leader in the design and manufacture of label application systems, has introduced the <u>Sirius 100</u>, a cost-effective pressure-sensitive labeling machine for fast-moving, highly flexible production lines. Designed to minimize downtime with toolless changeovers, the Sirius 100 brings the technology-driven linear labeling of Accraply's high-speed systems into a single- and twin-head labeling solution.

Combined with the field-proven Accraply 2xx Series label applicator, the Sirius 100 provides precise label placement accuracy for front, back and wrap applications in the personal care, household, food and pharmaceutical industries.

Joining the <u>Sirius MK6</u> advanced labeling system and <u>Trine</u> modular labeling station, the Sirius 100 is one of three labeling innovations engineered by Accraply in 2020. Jamie Clark, Accraply's Pressure-Sensitive Product Line Leader, introduced the Sirius 100 at the PACK EXPO Connects virtual trade show in November.

"The Sirius 100 is flexible and requires fewer change parts to run a variety of product shapes and sizes," Clark said. "Per Accraply's standards, it is built to be tough and to deliver years of reliable performance."

Accraply's next-generation smart HMI can be added to the Sirius 100, providing easy access to efficiency reporting, preventative maintenance alerts, self-diagnosing software, video tutorials and on-board consumable parts ordering. This interface also offers guidance for setup and scheduling maintenance tasks.

Accraply is one of several Barry-Wehmiller companies represented in <u>BW Packaging Systems</u>, which brings together the collective packaging capabilities of Accraply, BW Flexible Systems, BW Integrated Systems, Pneumatic Scale Angelus and Synerlink.

ABOUT ACCRAPLY

Comprised of the Accraply, Graham & Sleevit, Harland, Stanford and Trine brands, Accraply unites some of the most trusted names in product decoration and material converting. Known for our cutting-edge technology and innovative custom-engineered designs, Accraply has been credited with many industry firsts, and advances in application and converting technologies. Accraply, a Barry-Wehmiller Packaging Systems company, is a worldwide leader in the design, manufacture and support of pressure-sensitive (self-adhesive), roll-fed and shrink sleeve label application systems, as well as converting and finishing equipment, for the shrink sleeve and flexible-packaging markets. For more, go to accraply.com.

ABOUT BARRY-WEHMILLER

Barry-Wehmiller is a diversified global supplier of engineering consulting and manufacturing technology for the packaging, corrugating, sheeting and paper-converting industries. By blending people-centric leadership with disciplined operational strategies and purpose-driven growth, Barry-Wehmiller has become a \$3 billion organization with nearly 12,000 team members united by a common belief: to use the power of business to build a better world. CEO Bob Chapman shares the story of the company's transformation in his book, <u>Everybody Matters: The Extraordinary Power of Caring for Your People Like Family</u>.
