## Accraply introduces compact and affordable Stanford 438 slitter rewinder

MINNEAPOLIS, Minn. — Oct. 13, 2016 — Accraply, a leading manufacturer of automated labelling and converting systems, recently introduced the versatile and efficient Stanford 438 slitter rewinder. With ultrasonic unwind measurement, adaptive tension control, single or dual shaft winding, an onboard drive processor and an intuitive 12-inch touchscreen, the 438 is the most technologically advanced slitter in its class.

A cantilevered duplex differential slitter rewinder, the 438 offers converters an affordable, easy-to-operate, compact solution for their slitting needs. This machine is well suited for a wide range of products, including shrink sleeve, film, film laminates, self-adhesive label stock, paper and other flexible materials.

“We are very happy with the level of interest in Stanford’s technology,” noted Allison Fox, Converting Product Line Manager for Accraply. “The first 438 was sold during development, and it had a strong debut at the LabelExpo Americas event in September of 2016.”

Currently in its 74th year serving the converting industry, Accraply manufactures a selection of Stanford Doctor Machines®, duplex differential slitter rewinders, shrink sleeve finishing equipment and custom converting machinery. Accraply is one of a number of Barry-Wehmiller companies represented in [BW Packaging Solutions](#). Through their diverse capabilities, these companies can provide a single piece of equipment to fully integrated, tailor-made packaging line solutions for a wide range of industries, including: food and beverage, personal care, container manufacturing, pharmaceutical and medical devices, household products, paper products and textiles, industrial and automotive, and converting, printing and publishing.

Accraply, as well as the rest of the BW Packaging Solutions companies, will showcase its technology at PACK EXPO International, Nov. 6-9, 2016, at McCormick Place in Chicago.

### ABOUT ACCRAPLY, INC.

Comprised of the Accraply, Graham | Sleeveit, Harland, Stanford and Trine brands, Accraply unites some of the most trusted names in product decoration and material converting. Known for our cutting-edge technology and innovative custom-engineered designs, Accraply has been credited with many industry firsts and advances in application and converting technologies. Accraply, part of Barry-Wehmiller, is a worldwide leader in the design, manufacture and support of pressure-sensitive, roll-fed and shrink sleeve label application systems, as well as converting and finishing equipment, for the shrink sleeve and flexible-packaging markets.
