Baldwin to showcase FilmCylinderCleaning at NPE2018: The Plastics Show *Ahlbrandt, a Baldwin company, also will exhibit its Corona surface treatment systems at the show*

Baldwin Technology Company Inc. and Ahlbrandt System GmbH, a Baldwin Technology company, will showcase the FilmCylinderCleaning system and the Corona surface treatment systems at NPE2018 in Orlando, Florida.

ST. LOUIS – April 12, 2018 – Baldwin Technology Company Inc., a world leader in providing solutions for the plastic-sheet and film-production industry, is pleased to announce that it will exhibit its highly efficient FilmCylinderCleaning system in booth W9410 at NPE2018: The Plastics Show, held from May 7 to 11, 2018, in Orlando, Florida. Ahlbrandt System GmbH, a Baldwin Technology company, also will be showcasing its versatile Corona surface treatment systems in the same booth at the show. Ahlbrandt was acquired by Baldwin in 2017.

The Baldwin FilmCylinderCleaning system offers fully automatic chill cylinder cleaning that is performed during operation. This process maximizes productivity and safety by eliminating manual cleaning, while enhancing film quality, increasing machine equipment uptime and reducing waste.

The Ahlbrandt Corona surface treatment systems, tailor-made for each type of surface finishing, feature high-performance electrodes that promote effective surface finishing with enhanced ink and glue adhesion. With a slim design, these systems can easily integrate and retrofit into most areas of a production line, and the Corona's cassette rail system is quick and easy to service—electrodes can be changed in a few seconds and cleaning can be performed in a few minutes, maximizing production uptime.

“Baldwin offers highly productive, reliable and efficient equipment solutions, and we are excited for this opportunity to showcase our strong market position within the plastic-film industry,” said Daniel Gilman, Baldwin’s Vice President of Sales, Americas. “The FilmCylinderCleaning system and the Corona surface treatment systems provide customers with two great ways to maximize production uptime and safety, while enhancing film quality.”

ABOUT BALDWIN TECHNOLOGY COMPANY INC.

Baldwin Technology Company Inc. is a leading global manufacturer and supplier of innovative process-automation equipment, parts, service and consumables for the printing, packaging, textile, plastic film extrusion and corrugated industries. As a total solutions provider, Baldwin offers our customers a broad range of market-leading technologies, with a focus on improving the economic and environmental efficiency of production processes. Through a global footprint of 21 company-owned locations and an extensive network of partners, our customers are supported globally, regionally and locally by dedicated sales and service team members who add value by forming long-term relationships. Baldwin is privately owned by BW Forsyth Partners, a Barry-Wehmiller company. For more, visit baldwintech.com.

ABOUT BW FORSYTH PARTNERS

BW Forsyth Partners is the investment arm of multibillion-dollar global manufacturing and engineering consulting firm [Barry-Wehmiller](http://Barry-Wehmiller.com). Established in 2009, BW Forsyth Partners blends Barry-Wehmiller's unparalleled legacy of value creation and people-centric culture development with keen investing experience to help companies realize their true potential. With a focus limited to areas known well, BW Forsyth Partners seeks to partner with leadership teams to acquire small- to middle-market companies in the capital and component equipment, and professional services sectors. In each of our operating companies, BW Forsyth Partners deploys operational improvements and strategy development without compromising the autonomy, strategic vision and entrepreneurial spirit of their leadership teams.
