Baldwin to showcase its “Complete Solution” for security print at Tax Stamp and Traceability Forum

Highly customizable stand-alone production line includes serializing, barcoding, security features application, ink curing, 100% inline inspection and waste management

Baldwin’s Guardian PQC 100% Print Inspection can be retrofitted to existing presses, machines and transports.

ST. LOUIS — May 11, 2022 — Baldwin Technology Company Inc., the world’s leading innovator of advanced color-management solutions and inspection technology for the printing industry, will present its [“Complete Solution” for printing and inspection](#) at the Tax Stamp and Traceability Forum, held May 16 to 18 in Malta.

Baldwin’s Complete Solution can be any combination of feeders (roll or sheet), vacuum tables, inspection systems, inkjet printers, UV ink-curing systems, reject gates and bins, sheet stackers, and real-time monitoring and reporting tools. Alongside Baldwin’s technologies, optional solution components can be joined together through partnerships with industry-leading suppliers to create a world-class solution.

“Our Complete Solution provides security printers with the ability to improve quality, manage defects and add value to their product,” said Gerry Stanford, Baldwin’s Global Sales Leader. “Printers can also prevent future waste by monitoring and improving their processes with valuable performance data in hand.”

For advanced defect detection, Baldwin’s [Guardian PQC 100% Print Inspection](#) state-of-the-art camera systems can be mounted on one or both sides of the product to perform 100% print-quality inspection, verify variable data and inspect the most challenging security print features. The system offers lighting options for all materials and substrates, as well as for special applications, including holograms, covert serialization, covert security features and more. The Guardian PQC can also be retrofitted to existing presses, machines and transports.

As part of a data-connected defect-management workflow, the Guardian PQC is a feature-rich inline defect-detection system that enables printers to find and remove defects quickly—and monitor their processes to prevent defects from occurring again or repeatedly. This technology provides complete print-quality verification from prepress through production, reporting and archiving for perfect runs.

“What makes our Complete Solution unique in the industry is that customers can work with Baldwin as a single source for components from the best technology manufacturers in our industry,” said Erwin Wagner, Baldwin’s Global Sales Manager. “With the modular and highly configurable nature of the Complete Solution, printers can start with an arrangement that meets today’s business needs and budget, and easily upgrade and expand to accommodate future requirements.”

Baldwin recently realigned its sales teams to optimize service and simplify access to its process-improvement and consumables technologies for printing and packaging customers in more than 100 countries. Two new sales professionals have since joined the team, covering smaller regional geographies and providing customers with a single point of contact for all of Baldwin’s product lines.

ABOUT BALDWIN TECHNOLOGY COMPANY INC.

Baldwin Technology Company Inc. is a leading global manufacturer and supplier of innovative process-automation equipment, parts, service and consumables for the printing, packaging, textile, plastic film extrusion and corrugated industries. As a total solutions provider, Baldwin offers our customers a broad range of market-leading technologies, with a focus on improving the economic and environmental efficiency of production processes. Through a global footprint of 21 company-owned locations and an extensive network of partners, our customers are supported globally, regionally and locally by dedicated sales and service team members who add value by forming long-term relationships. Baldwin is privately owned by BW Forsyth Partners, a Barry-Wehmiller company. For more, visit baldwintech.com.

ABOUT BW FORSYTH PARTNERS

BW Forsyth Partners is the investment arm of multibillion-dollar global manufacturing and engineering consulting firm Barry-Wehmiller. Established in 2009, BW Forsyth Partners blends Barry-Wehmiller’s unparalleled legacy of value creation and people-centric culture development with keen investing
