Legacy Flexo invests in second Fusion C press from PCMC

Flexographic printing press includes award-winning SteadyPrint anti-bounce technology

Legacy Flexo in Green Bay, Wisconsin, has invested in a second Fusion C press from PCMC.

Green Bay, Wis. – Jan. 27, 2020 – Paper Converting Machine Company (PCMC), part of Barry-Wehmiller, has announced the sale of a second Fusion C printing press to Legacy Flexo Corp. in Green Bay.

“We are excited to be purchasing a second Fusion C flexographic press,” said Dan Aberly, Operations and Sales, Legacy Flexo. “We’ve experienced a lot of success with our first Fusion C, which has allowed us to offer our customers more efficient runs. The fact that PCMC has been a true partner with us, providing exceptional quality and service, and is local to us were also deciding factors.”

The Fusion C has a smaller footprint with fewer parts, but incorporates many fast make-ready and waste-saving features, including the innovative SteadyPrint technology. Winner of the 2019 FTA Technical Innovation Award, SteadyPrint significantly reduces the effects of

bounce when printing graphics with hard edges due to its bearing arrangement, which is coupled with an algorithm utilizing noise-canceling technology. With patents pending on all features, SteadyPrint is currently the only product on the market using this kind of technology to eliminate disturbances and provide real-time monitoring.

“We had the opportunity to service an existing customer based on first-hand experience with PCMC and the Fusion C,” said Mike Shaw, PCMC Regional Sales Manager. “That speaks volumes about the Fusion C’s value and performance. We look forward to continuing a strong partnership with Legacy Flexo.”

ABOUT PAPER CONVERTING MACHINE COMPANY (PCMC)

Paper Converting Machine Company (PCMC) specializes in the design and manufacture of high-performance converting machinery for the tissue, nonwovens, package-printing and bag-converting industries worldwide. Our comprehensive product offerings include rewinding, laminating, printing, embossing, perforating and packaging equipment for tissue and towels; folding and converting machines; and a complete range of flexographic printing presses and laser anilox cleaners, serving the flexible-packaging, prime-label and carton-converting industries. For more about PCMC, which is part of Barry-Wehmiller, go to pcmc.com.

ABOUT BARRY-WEHMILLER

Barry-Wehmiller is a diversified global supplier of engineering consulting and manufacturing technology for the packaging, corrugating, sheeting and paper-converting industries. By blending people-centric leadership with disciplined operational strategies and purpose-driven growth, Barry-Wehmiller has become a \$3 billion organization with nearly 12,000 team members united by a common belief: to use the power of business to build a better world. CEO Bob Chapman shares the story of the company’s transformation in his book, Everybody Matters: The Extraordinary Power of Caring for Your People Like Family. To learn more, go to barrywehmiller.com.
