PCMC to unveil Paragon tissue rewinder

Online event will showcase machine's winding simplicity and product control

GREEN BAY, Wis. — May 19, 2021 — Paper Converting Machine Company (PCMC)—a division of Barry-Wehmiller and a global supplier of high-performance converting machinery for the tissue, nonwovens, package-printing and bag-converting industries—is proud to present its new Paragon rewinder during an online launch event.

Held June 8 at 9 a.m. (CT), the virtual reveal will include a machine overview, a demonstration of its patent-pending winding technology and a live Q&A session. In addition, attendees will learn how the Paragon's design allows for robust caliper, bulk and diameter flexibility, and how its new HMI gives operators unparalleled machine control with intuitive navigation and fewer, simpler adjustments.

"PCMC has a long history of pioneering new ideas and meticulously proving they match our customers' needs," said Andrew Green, PCMC Vice President of Tissue and Folding for the Americas. "Paragon is no exception, as we put countless hours into designing, engineering and testing it. We are extremely excited to highlight how Paragon produces unmatched simplicity, productivity and quality for premium tissue products."

Reservations for the free Paragon launch event are open now at bit.ly/pcmcparagon. Those who cannot attend live, but who have registered, will receive a recording of the event afterward.
